

Igor Goncharenko

Field Operations Manager | Technical Integrator [Email] | [Phone] | [City, Israel]

Professional Summary

Hands-on Technical Manager with extensive experience in mechanical, electrical, and optical infrastructure. Proven ability to lead deployment teams in challenging environments (High-rise construction, Fiber optics). Enthusiastic about technology and automation, with a private lab dedicated to testing advanced systems (Home Automation, AI, Networking) demonstrating strong self-learning and integration capabilities.

Professional Experience

Schindler Group | Site Supervisor (BEYOND Tower)

August 2023 – Present | Israel

- **Technical Supervision:** Overseeing technical installation of high-speed elevator systems in a high-rise environment. Solving on-site mechanical and logistical challenges in real-time.
- **Safety & Compliance:** Ensuring all work meets strict safety protocols (Work at Height) and quality standards.
- **Documentation:** Managing detailed technical reports and progress logs using digital tools.

URICOMS (Partner Communications) | Fiber Optic Specialist / Team Lead

2019 – 2023 | Israel

- **Network Infrastructure:** Expert in FTTx deployment, optical splicing, and OTDR testing. Managed the end-to-end installation process from street cabinet to customer premises.
- **Technical Leadership:** Trained teams on efficient cable management, signal optimization, and troubleshooting complex network faults.

Vira & Assembly Ltd. | Elevator Technician

2020 – 2022 | Israel

- **Installation:** Mechanical assembly of guide rails, motors, and cabin components. Reading and interpreting complex schematics and blueprints.

Technical Skills & Projects

Proficiencies

- **Field Work:** Mechanical Installation, Low Voltage Wiring, Fiber Optics, Logistics Management.
- **Tools:** Microsoft Office, Project Management Apps, Reading Technical Blueprints.

Featured Hobby: "Unified Smart Infrastructure"

Built and maintaining a complex home lab to explore future technologies.

- **Home Automation:** Integrated Zigbee/WiFi sensors, lights, and switches into a central Home Assistant server, automating daily routines.
- **AI & Linux:** Self-taught basic Linux administration (Proxmox/Docker) to run local AI models (Ollama) and media servers.

- **Problem Solving:** Used AI coding assistants to write custom Python scripts for system monitoring and alerts, demonstrating ability to adapt and learn new tools rapidly.

Education & Licenses

- **Mechanical Mechanical Studies** (3 Years)
- **Licenses:** Forklift (20T), Driver's License B, Work at Height Permit.
- **Military:** IAF Staff Sergeant (2013-2015).

Languages

- **Hebrew:** V. Good
- **Russian:** Native
- **English:** Basic Technical
